## **PRESS RELEASE**

**FOR IMMEDIATE RELEASE**

### **Manzanita Systems Announces MP2TSMS 4.1**

**MPEG-2 Transport Stream Multiplexer Adds CableLabs® HD & SD Profiles**

POWAY, California—August 27, 2007—Manzanita Systems, Inc. today announced that MP2TSMS 4.1, an update to the MPEG-2 Transport Stream Multiplexer for Single programs software application, will be available worldwide on August 27, 2007. The version 4.1 release of the entry-level multiplexer includes new key features such as specific CableLabs HD and SD profiles, remote desktop support on Microsoft® Windows® operating systems, the maximum number of audio elementary streams has been increased from two to four, support for substreams in Enhanced-AC-3 (Dolby® Digital Plus) elementary streams, and the ATSC buffer model for AC-3 audio elementary streams has been updated so that the model complies with the ATSC Document A/53 Revision E Amendment No. 1.

#### **Pricing and Availability**

MP2TSMS 4.1 is available for Microsoft Windows, Linux, and Apple® Mac OS® X. MP2TSMS is sold directly through Manzanita Systems for the list price of \$895 (US). Owners of previous versions of MP2TSMS may call Manzanita Systems for upgrade pricing, 858.679.8990. For more detailed information on product features, technical specifications, and evaluation requests, please visit:
